Office Action Summary	Application No. 10/766,548	Applicant(s) LAYNE, DAVID	
	Examiner Mark J. Beauchaine	Art Unit 3653	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

Claims 1-4 are objected to because of the following informalities:

The term "the checkout" should read "a checkout" (line 1 of each claim).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "securing promotional materials" (claim 1, line 3) is ambiguous since it is unclear what element(s) secure the promotional materials.

The term "lateral manipulation" (claim 3, lines 2 and 3) is ambiguous since no point of reference is associated with said term.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 2,650,678 by Newbold ("Newbold"). The vertically suspended partition panel 27 disclosed by Newbold is mounted on rail 19 and comprises live hinge 29 attached to said panel and provides for the vertical manipulation of said panel. Newbold further discloses turret 24/25 connected to said panel by way of live hinge 29 facilitating the lateral manipulation of said panel.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newbold in view of Patent Number 5,933,994 by Misaresh ("Misaresh"). The vertically suspended partition panel 27 disclosed by Newbold is mounted on rail 19 and comprises hinge member 29 connecting turret 24/25 with said partition panel. Said partition panel further comprises panel frame 25. Newbold fails to disclose a panel

hatch. Misaresh teaches a partition panel 10 comprising panel hatch 40 and frame 112 for the purpose of loading and securing promotional materials. It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the hatch/frame configuration of Misaresh into the apparatus of Newbold for the purpose of loading and securing promotional materials.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Newbold. The vertically suspended partition panel 27 disclosed by Newbold is mounted on rail 19 via wherein a turret base 23 housing bearings 22 facilitates the linear motion of said panel along said rail. Newbold fails to disclose bearings 22 as being made of metal. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use metal to fabricate bearings for the purpose of optimizing the structural integrity of the bearings.
